These National VOAD Emotional & Spiritual Care resources are provided to enhance the supportive care and compassion offered to persons who have been impacted by disasters and other crises.

Created by the many organizations who support emotional and spiritual care, they are intended to be culturally sensitive, context appropriate, and guidelines leading to hallmarks of excellence for all organizations whose intent is always to be helpful and supportive in meaningful and appropriate ways providing respect and kindness throughout the disaster continuum.

These resources are “living documents” and grow and expand as nature and disaster needs expand.
